## PROFESSIONAL EXPERIENCE

### BT Group plc

Software Engineer professional

London, UK

Sep 2024 - present

Collaborated with a team of 12 to build web applications in an agile setting through JIRA. Tech stack included Typescript, React, Next.js, REST API, MSAL, and Google Maps.

- Released React web applications EE Coverage Checker, BT Coverage Checker, and MVNO Coverage Checker for the respective customers. Successfully **migrated from the legacy tech stack in Java to a business strategic stack to reduce server costs**.
- Deployed a React web application, BT Smart Assistant, a BT customer's self-serve broadband diagnostic tool. **Reduce the cost and reliance on the contact centre**. Provide a 24/7 diagnostic experience for the BT customers.
- Developed a customer-facing React Native app. Utilise MSAL authentication, a business-strategic API, Expo, Zustand, and a multi-brand architecture. **Provide a responsive and robust mobile application for the customers**.

### Dorling Kindersley Limited

Software Engineer

London, UK

Nov 2022 - Dec 2023

Developed with a team of 10 to build web and mobile applications in agile development through JIRA. Tech stack included Typescript, React, Next.js, Capacitor, REST API, Android Studio, Xcode, Shopify, Google Tag Manager, Storybook, GraphQL, and Tailwind CSS.

- Maintained existing mobile apps by updating UI/UX, outdated packages, and REST API to **reduce the application crash rate by more than 60%**
- Boosted web applications' load time by 20%** from utilising React SSR, caching API responses, revalidating API under conditions, implementing lazy loading, and eliminating unnecessary page rerender due to React life cycle
- Established an E-commerce platform with paid and free content for different countries, which **deepened brand recognition and generated company income**

### Zetakey Solutions Limited

Web Application Developer

Hong Kong

Aug 2018 - Mar 2022

Orchestrated embedded web applications in a team of 5 with agile methodologies. Tech stack included JavaScript, React, REST API, Socket IO, AWS, and Leaflet.

- Directed, led, architected, and mentored a team of 3 junior developers on a medical project** designed to provide hospital staff with informational management and assistance on the operational procedures to decrease the majority of manual labour and ensured system scalability. Worked closely with clients to assemble requirements and feedback, implemented in a modern React stack, regularly performed code review, and applied Jest testing protocols utilising CI/CD, **ensuring a robust codebase following best practices and scalable infrastructure**
- Contributed to the optical fibre project by creating a real-time monitoring system with a fibre health map, paired with an instant alarming system through email and phone notification. **Slashed more than 70% of the end users' manual work**

## EDUCATION

Washington State University - Bachelor of Science in Computer Science

Pullman, USA
